

CHETAN DEORE

Senior Software Engineer — .NET 8+ Full Stack — AI-Augmented Development

+91-9503002981 | cdeore20@gmail.com | India | linkedin.com/in/cdeore

SUMMARY

Software engineer shipping production .NET 8 systems 3x faster using AI-augmented development (Amazon Q, Claude, Copilot). Built full-stack applications handling 5M+ transactions/month at 99.2% uptime while using agentic workflows to automate deployment and testing pipelines.

SKILLS

AI-Augmented Development Tools (Daily Usage)	: Amazon Q, GitHub Copilot, Cursor IDE, Claude, ChatGPT, Agentic AI Workflows, Code generation, Debugging assistance, Test writing, Documentation automation
Backend Development	: .NET 8, C#, ASP.NET Core Web API, Entity Framework Core, Semantic Kernel
Frontend Development	: Angular 14+, TypeScript, React.js, Responsive UI, HTML/CSS
Databases & Optimization	: PostgreSQL, MSSQL, pgvector, Query Performance Tuning, Stored Procedures
Cloud & Infrastructure (Production Deployments)	: Microsoft Azure (App Services, Functions, CosmosDB, AI Services, Container Registry), Docker, GitHub Actions CI/CD, Agentic Deployment Automation
Development Practices	: Test-Driven Development (TDD), Code Reviews, Git/GitHub, Agile, Debugging

EXPERIENCE

Senior Software Engineer, LTM Limited (formerly LTIMindtree), Pune, India **Jul 2025 — Present**

Generative AI Initiative & .NET Architecture — Pune, India

- Integrated Amazon Q and Claude into development workflow, reducing average feature development time by 35% (5 days → 3.25 days) through AI-assisted code generation, documentation, and test writing.
- Built agentic CI/CD pipeline using GitHub Actions + custom orchestration logic, automating deployment validation and rollback decisions—reducing deployment time from 2.5 hours to 18 minutes (86% faster) with zero manual intervention required.
- Established code review process using Cursor IDE’s AI-assisted suggestions, reducing code review cycles from 3 days to 1 day (66% improvement) while maintaining test coverage at 88%.
- Designed and deployed .NET 8 microservices replacing legacy monolith, reducing application startup time from 8.2s to 1.4s (83% improvement) and cutting technical debt by \$120K across 3-year roadmap.
- Built data processing pipeline using Semantic Kernel + pgvector for intelligent document classification, processing 10K+ enterprise documents daily with 92% accuracy (vs. 64% keyword search baseline).
- Mentored 3 junior developers on AI-augmented development practices (Amazon Q, Claude, prompt engineering for code generation), enabling 40% productivity lift across engineering team.

Software Engineer, 12th Wonder, Pune, India

Apr 2022 — Jun 2025

Full-Stack .NET + AI-Enhanced Development — Pune, India

- Accelerated feature velocity by adopting GitHub Copilot for boilerplate generation and Claude for architectural problem-solving, reducing average PR cycle time by 45% while maintaining code quality standards.
- Automated test generation using AI tools, increasing unit test coverage from 62% to 88% in 3 months, reducing production bugs by 35% (from 8 critical/month to 5.2).
- Architected and delivered 12 major features on-time for B2B lead generation platform using .NET Core, Entity Framework, Angular 14+, and PostgreSQL—maintaining 99.2% uptime across 3-month cycles.
- Enhanced data query performance by 60% (2.8s → 1.1s API response time) by implementing advanced indexing, stored procedure optimization, and pgvector integration for semantic search—directly improving customer dashboard load times and user retention by 12%.
- Built intelligent API gateway with metadata-driven payload mapping, seamlessly integrating 8+ third-party data sources with zero data loss and 99.8% request success rate.
- Improved code quality by leading TDD adoption and code review process, reducing production defect escape rate from 12% to 1.3% (89% improvement) and enabling faster iteration cycles.

PROJECTS

TITAN Test Life Cycle (Product-Based)

- .NET Web API · MSSQL · GitHub Actions · Amazon Q
- Architected API layer for product test lifecycle management serving 200+ QA engineers.
- Optimized MSSQL stored procedures reducing query latency by 45% (1.8s → 1.0s)
- Designed test report generation pipeline processing 5K+ test runs/day
- Used Amazon Q to auto-generate 80% of unit tests, reducing testing cycle from 2 weeks to 4 days
- Reduced bug report resolution time by 3 days via intelligent categorization logic
- Impact: Shipped v2.0 on-time; 99.1% API uptime; QA team productivity +40%

TechConnectr (Service-Based)

- .NET Core MVC · PostgreSQL + pgvector · Claude + Copilot · Docker · GitHub Actions
- Built document ingestion and semantic search pipeline for B2B lead generation platform.
- Implemented file processing layer handling 50K+ documents/month (PDF, DOCX, CSV)
- Used Claude API to generate document embedding strategy (saved 2 weeks design time)
- GitHub Copilot accelerated parsing logic development by 35%
- Optimized PostgreSQL queries reducing lead retrieval time by 60% (2.1s →0.9s)
- Built agentic validation pipeline using custom orchestration logic with AI-generated test cases
- Created intelligent payload mapping system reducing integration errors from 12% to 1.3%
- Impact: Enabled sales team to onboard 3 new lead sources in Q2; ARR growth +\$500K

CERTIFICATIONS

Microsoft Certified: Azure Developer Associate (AZ-204), Microsoft	Jan 2024
Microsoft Certified: Azure Fundamentals (AZ-900), Microsoft	Jan 2023
Amazon Q Developer (Self-study, hands-on usage)	
GitHub Copilot Workshop (GitHub Skills), GitHub	Jan 2024
Prompt Engineering for Code Generation (Udemy), Udemy	Jan 2024
Advanced .NET 8 Patterns & Async Design (Pluralsight), Pluralsight	Jan 2025
Agentic AI Workflows & Orchestration (Custom project-based learning)	
Azure AI Engineer Associate (AI-102) — Exam scheduled Q3 2026	Jan 2027

EDUCATION

Sandip University, Nashik, Nashik - Master of Computer Applications (MCA), Computer Applications	2022 — 2022
Coursework: Distributed Systems, Database Optimization, Software Architecture	
Pratap College, Amalner, Amalner - Bachelor of Computer Applications (BCA), Computer Applications	2020 — 2020
